

In the Specification

At page 1, lines 5-8, under the header Related Patent Documents, please replace the paragraph as follows:

This is a continuation-in-part of U.S. Patent Application No. 10/045,636, filed on October 26, 2001 (~~issuing on October 21, 2003 as U.S. Patent No. 6,636,014~~), now U.S. Patent No. 6,636,014 and entitled "Approach for Charging Trailered Battery," which is incorporated herein by reference and to which priority is claimed under 35 U.S.C. § 120 for common subject matter.

At page 10, lines 5-17, please replace the paragraph as follows:

Several other articles are used to complete the overall assembly. The rear electrical lines 144 include terminals 144a and 144b for electrically coupling to the anode and cathode of the secondary battery and including a trailered plug-in adapter 144c at another end thereof. The intermediary set of interconnecting electrical lines 142 includes a first plug-in adapter 142a at one end for releasably plugging into the main plug-in adapter 140g and electrically coupling to the primary battery 122 and a second plug-in adapter 142b at another end for releasably plugging into the trailered plug-in adapter 144c and electrically coupling to the secondary battery 130. Finally, a set of harnesses 160, ~~162~~, such as nonconductive tie wraps, are used to secure the electrical lines. Preferably, each of the plug-in adapters is insulatively-enclosed in plastic with a female black-wire receptacle and an adjacent male red-wire receptacle for fool-proof mating.
